

QUICK COMMERCE AND DELIVERY ANALYTICS

Executive Summary

The Quick Commerce industry generated ₹57.16 Cr revenue across 8 platforms, processing nearly 1 million orders with an average delivery time of 16.45 minutes and an average customer rating of 2.89/5.

The analysis indicates that while demand for quick commerce is strong, customer satisfaction and delivery efficiency remain major growth challenges. Companies that improve operational reliability, delivery speed consistency, and customer experience are likely to gain market share.

Key Insights

1. Swiggy Instamart Leads Revenue Generation.

Top revenue contributors:

1. Swiggy Instamart
2. Blinkit
3. Zepto
4. Big Basket
5. Amazon Now
6. Dunzo
7. Jio Mart

Insight

The market leader does not have an overwhelming advantage, indicating intense competition and low switching costs for customers.

Business Impact

Customer experience and delivery performance can quickly shift market share.

2. Revenue is Driven by Mid and High Value Orders

The "Order Value Influence on Revenue" chart shows:

- Mid-value orders contribute the largest share.
- High-value orders are the second largest contributor.
- Premium orders contribute relatively little.

Insight

Customers are comfortable placing medium-sized baskets but are not yet using quick commerce heavily for premium shopping.

Opportunity

Premium grocery and specialty products remain underpenetrated.

3. Young Adults Are the Most Valuable Customer Segment

Revenue by age group shows:

Age Group	Performance
Young Adult	Highest
Adult	High
Middle Age	High
Young	Moderate
Senior	Lowest

Insight

Working professionals are the primary revenue drivers.

Recommendation

Target:

- Office-goers
- Working couples
- Urban professionals

through subscriptions and loyalty programs.

4. Revenue Concentration in Metro Cities

Top revenue cities include:

- Gurgaon
- Delhi
- Bengaluru
- Hyderabad
- Chennai

Insight

- Metro cities dominate quick commerce spending.
- Business Impact
- Urban density and purchasing power remain key growth drivers.

5. Customer Rating Directly Influences Revenue

The Revenue vs Rating scatter plot shows a positive trend.

Insight

Higher customer ratings correspond to higher revenue generation.

This suggests:

- Better service
- Better delivery experience
- Better repeat purchases

lead directly to business growth.

Strategic Conclusion

Improving ratings is one of the fastest ways to increase revenue

6. Daily Essentials Dominate Consumer Demand

Top performing categories:

1. Daily Essentials
2. Groceries
3. Household
4. Snacks
5. Beverages

Insight

Quick commerce is primarily solving routine replenishment needs rather than impulse purchases.

Business Opportunity

Expand:

- Milk subscriptions
- Fresh produce bundles
- Daily refill programs

7. Industry-Wide Delivery Performance Issue

Average delivery time = 16.45 minutes

Company comparison:

Best performers:

- Zepto
- Dunzo

Slowest performers:

- Jio Mart
- Amazon Now
- Big Basket

Insight

Delivery efficiency differs significantly across platforms.

This creates a major competitive opportunity.

Recommendations

1. Improve Delivery Efficiency Across All Platforms

The dashboard shows significant variation in delivery times, with some companies averaging above 20 minutes.

Action

- Increase dark-store density.
- Optimize delivery routing.
- Improve rider allocation during peak hours.

Expected Impact

- Faster deliveries.
- Higher customer satisfaction.
- Increased repeat purchases.

2. Focus on Customer Experience Improvement

The average customer rating is only 2.89/5, indicating considerable dissatisfaction.

Action

- Strengthen customer support.
- Reduce order cancellations.
- Improve product quality checks.

Expected Impact

- Higher ratings.
- Better customer retention.
- Increased revenue.

3. Expand Premium Product Offerings

Premium orders contribute the smallest share of revenue.

Action

- Introduce gourmet foods.
- Add imported products.
- Launch premium grocery bundles.

Expected Impact

- Higher Average Order Value.
- Improved profit margins.

4. Strengthen Presence in High-Revenue Cities

Cities like Gurgaon, Delhi, Bengaluru, and Hyderabad generate the highest revenue.

Action

- Open additional dark stores.
- Improve inventory availability.
- Increase marketing spend in top-performing cities.

Expected Impact

- Revenue growth from existing strong markets.

5. Target Young Adults with Personalized Campaigns

Young Adults generate the highest revenue.

Action

- Offer office-hour delivery promotions.
- Create student and working-professional discounts.
- Use personalized recommendations.

Expected Impact

- Increased order frequency.
- Higher customer lifetime value.

6. Improve Low-Performing Platforms Through Operational Benchmarking

Jio Mart, Amazon Now, and Big Basket trail market leaders.

Action

- Benchmark delivery processes against Zepto and Swiggy Instamart.
- Improve inventory accuracy.
- Reduce delivery times.

Expected Impact

- Improved competitiveness.
- Better customer retention.

7. Increase Revenue from Senior Citizens

The Senior age group contributes the lowest revenue.

Action

- Simplify app navigation.
- Offer medicine and healthcare delivery.

- Introduce subscription-based essential delivery plans.

Expected Impact

- Access to an underserved customer segment.
- New revenue streams.

8. Develop Strong Subscription Programs

Quick commerce is driven by repeat purchases of daily essentials.

Action

- Launch monthly memberships.
- Offer free deliveries.
- Provide exclusive discounts to subscribers.

Expected Impact

- Increased retention.
- More predictable revenue.

9. Expand into Tier-2 Cities

Revenue is concentrated in major metros, leaving significant untapped markets.

Action

- Expand into cities such as Mysuru, Kochi, Coimbatore, Surat, Indore, and Nagpur.
- Use smaller fulfillment centers for cost efficiency.

Expected Impact

- Early-mover advantage.
- Long-term customer acquisition.

10. Leverage Data Analytics for Demand Forecasting

Order patterns and category performance vary significantly across locations and age groups.

Action

- Implement demand forecasting models.
- Predict peak-order periods.
- Optimize inventory allocation.

Expected Impact

- Reduced stockouts.
- Better inventory turnover.
- Higher profitability.

Strategic Recommendations for Market Leaders

Swiggy Instamart

- Increase premium product penetration.
- Introduce loyalty memberships.
- Focus on customer rating improvements.

Blinkit

- Improve delivery consistency.
- Expand aggressively into Tier-2 cities.
- Strengthen customer engagement programs.

Zepto

- Maintain delivery speed advantage.
- Expand geographical coverage.
- Improve profitability through higher basket values.

Strategic Recommendations for Low Performers

Jio Mart

- Reduce delivery times.
- Improve platform visibility.
- Increase promotional offers.

Amazon Now

- Strengthen quick-commerce positioning.
- Invest in hyperlocal fulfillment centers.
- Improve delivery speed.

Big Basket

- Focus on premium grocery shoppers.
- Improve express delivery coverage.
- Increase order frequency through subscriptions.

Final Business Recommendation

The most critical finding from the dashboard is that customer satisfaction, delivery efficiency, and revenue are strongly interconnected. Companies that improve delivery reliability, enhance customer experience, and expand into underserved segments (premium shoppers, senior citizens, and Tier-2 cities) will be best positioned to capture future growth in the quick-commerce market.
